CDS: RUNNING WATER BOTTLE (PROMOTIONAL PRICES)

ITEM DESCRIPTION	QUANTITY
Unisex Running T-Shirt Specification Feature and Specification Details Material Composition 90%–95% Polyester (high-grade or recycled) for quick drying, mixed with 5%–10% Spandex/Elastane for multi-directional stretch Fabric Weight Ultra-lightweight; typically, 110–130 GSM (Grams per Square Meter). Fit & Silhouette Straight/Boxy cut with drop-shoulder or raglan sleeves to prevent underarm restriction. Includes an elongated rear hem (drop-tail) to prevent the shirt from riding up. Unisex Running Tights Specification Material Composition 75%–80% Nylon/Polyamide (for durability and compression) blended with 20%–25% Spandex/Elastane (for high snap-back elasticity). Fabric Weight Mid-weight for structure; typically 220–260 GSM. Must pass the "squat test" for 100% opacity. Waistband Design Wide, flat elastic waistband sitting mid-rise. Must include an internal continuous drawcord for micro-adjustments. Pocket System Minimum of one secure bounce-free zippered pocket on the rear waistband (sized for a standard smartphone) and dual-side drop-in mesh pockets for energy gels. Fabric Treatments Hydrophobic moisture-wicking finish, anti-microbial/anti-odor silver-ion treatment, and a minimum rating of UPF 30+ UV protection.	20
